

250 Series Professional Shotgun Microphones

Affectionately known in Japan as “Ni-Go-Maru” (Japanese for “250”), the Azden 250 Series Professional Shotgun Microphones deliver professional-grade performance and world class build quality at an affordable price.

Professional-Grade Performance

Low noise, full-range frequency response and a narrow supercardioid pickup pattern for professional dialogue capture.

Sonic Consistency

While each microphone model has its own unique physical characteristics, users can expect the same superb sound quality and side-noise rejection across the board. That’s because each model uses the same high-quality microphone element and the same length interference tube.

Series Versatility

The four models in the 250 Series are suited for a number of different applications, ranging from boom pole mounting to a variety of different on-camera mounting situations.

World Class Build Quality Backed by 10-Year Warranty

Each microphone is assembled by hand in Azden’s factory in Japan. This craftsmanship is backed by a 10-year warranty.

Affordability

Models in the 250 Series fall in a very attainable price range from \$199 to \$249 (in the US).

Natural Sound

The 250 series microphones have become notable in the industry for their natural, professional sound. While other microphone manufacturers hype-up the bass response, making the audio sound muddy, or over-accentuate high-mids, making dialogue tracks sound harsh, users can expect all of the 250 Series microphones to accurately record the sound of their scenes.
